

How can your smartphone help streamline your workflow?

I am always trying to find the latest and greatest technology that would make the lives of our members easier. I have also watched the trends and realize many agents are now using their smartphones more then ever in their day to day business. Focusing on this one piece of technology, I have compiled some of the apps I find could be most useful to you and others in our industry... of course, the trick is finding something EQUALLY as usefull as it is easy to use.

REALTOR.com Mobile Apps

<http://www.realtor.com/mobile?source=web>

Free for Android, Windows Phone, iPhone, and iPad

Instantly access the largest and most popular database of real estate listings with this app, which supports GPS-based searches to show what properties are available and what recently sold within a definable area based on your present location. Results are automatically mapped, with links to key listing details and property photos with a listing agent's contact info.

JOTnot Scanner Pro

<https://itunes.apple.com/us/app/jotnot-scanner-pro-scan-multipage/id307868751?mt=8>

For iPhone, and iPad

There are actually a lot of good scanner apps such as this one. These allow you to take a photo and it will convert it to a pdf or allow you to fax them from your phone. They come in pretty handy when you are trying to get things done asap!

Sign My Pad

<http://autriv.com/sign-my-pad/>

For Androids, iPhone and iPad

Great app for filling in, signing, saving and sharing contracts. Fully featured, reliable and easy to use. In usual business fashion, there are other similar apps available such as *SignEasy*.
